

IN THE DRAWING

Please amend the drawing 2, as the attached amended copy. In the amendment of the drawings, the numeral 15 is added and the indication of the numeral 55 is changed. No other portion is amended. Thereby, no new matter is added.

## **REMARKS**

Very thanks for Examination's suggestion and thanks for finding some citations about the present invention, thereby, the applicant may know more information about the invention. This case has been carefully reviewed and analyzed in view of the office action. All details of the reference prior arts are fully considered and compared with the present invention.

Responsive to the objections and rejections made of the Examiner in office action. We have amended the specification, claims and abstracts. All the errors disclosed in that office action has been corrected according to the Examiner's indications disclosed in the official action.

Indeed the citations disclose some features of the present invention, and the applicant agrees with these viewpoints, however applicant discovers that some features of the present invention are not wholly disclosed by the citations, which are claimed in the original claims.

Since in the office action, the original claims 7, 8 and 10 are allowed, thus in this amendment, the applicant decides to cancel Claims 1 to 6, 9, 11 to 17 (11 to 17 are original cancelled in the previous amendment), without prejudice or disclaimer of the subject matter thereof, add amend claims 7, 8, and 10 as the following. Claim 7 is the combination of the original claims 1, 4 and 7 (since the claim 7 is dependent to claim 4 and the claim 4 is dependent to claim 1), claim 8 is the combination of the original claims 1, 4 and 8 and the claim 10 is the combination of the original claims 1, 4 and 10. In the amendment of the claims, the screwing angle is changed as screw angle and some minor errors are amended. Thereby it is assured that no new matter is added in this amendment.

We feel sorry in the numerals of the elements of the present invention in the specification, claims, and drawings so that make the reader feel

fuzzy, this is because in the original scripts are modified many times. In the amendment, we have carefully checked and amend the numerals of elements about the thread section, helix angle, thread and pitch for all the specification, drawings, abstract and claims. After amendment, all these are matched. We do not re-number any element because we are afraid that this action will make more fuzzy conditions. Furthermore, in the amendment of specification, the screwing angles  $\theta 1$  to  $\theta 4$  are changed as helix angles  $\theta 1$  to  $\theta 4$  so as to match the general uses in mechanics.

**If there still is any error in the claims or specification, Applicant requests and authorizes Examiner to amend the claims of the present invention so that the claim and specification can match the requirement of U. S. Patent. Attentions of Examiner to this matter are greatly appreciated.**

Since in the original claims 7, 8 and 10 are allowed, and in this amendment, the applicant has cancelled Claims 1 to 6, 9, 11 to 17, and we have amended the specification, claims and abstracts. All the errors disclosed in that office action has been corrected according to the Examiner's indications disclosed in the official action. Thus, it is now believed that the subject Patent Application has been placed in condition for allowance, and such action is respectively requested.

Respectfully submitted.

*H/o Jen-Tong*
